Also contains Imaging Solutions release IMG_16.02		Site-Four	December 6, 2015
		Self-Processors	December 14 & 15, 2016

Running Your Custom Queries

If a file listed below is included in any of your custom reports or inquiries, you must refresh the Query definition:

1. On the CU*BASE Report Builder 1 menu (MNQUERY) choose 2=Change and enter your Query name, then use Enter to proceed
2. Select **Choose Files**
3. Use Enter → to move through these screens until you're back to the Report Builder - Main Menu
4. Use **Exit** ↑
5. Select **Save query definition** and Run **Interactively** then use Enter →

NOTE: If the field changes from a numeric to an alpha-numeric field, you will need to add 'single quotes' around the Selection Criteria.

Updating Your Automated Queries

If you ever remove or add a file to a Query definition of a Query that you have automated, **don't forget to update the Query automation configuration** as follows.

1. On the Configuration Functions menu (MNCNFX) select **Custom (Query) Reports/Files**
2. Select the Query and use Edit
3. Make the necessary changes and use Add/Update (F5) to save

NOTE: You do not need to do this if all you do is tweak a selection parameter such as modifying a date.

NEW DATABASE TABLES

*For details on the formats and available values for specific table columns, refer to the Database Search Assistant, available on the CU*BASE Report Builder 1 menu (MNQUERY).*
